

## Therm-Chek® BH383C

### Stabilizer Product Profile

#### Product Description

Therm-Chek® BH383C is a proprietary barium-zinc heat stabilizer. Therm-Chek® BH383C may be used to enhance base stabilizer systems. This booster type stabilizer improves high and intermediate heat aging properties of PVC compounds. Therm-Chek® BH383C can be used in flexible, semi-rigid, and rigid PVC compounds.

In all applications, use Therm-Chek® BH383C at 0.1 to 1.0 phr in addition to the normal use level of a base stabilizer.

#### Safety and Handling

Complete toxicity and handling information can be found on the Material Safety Data Sheet, which is available on request.

#### Typical Properties

Physical State  
Toxicity

Creamy White Powder  
Normal for barium compounds,  
not to be ingested
